

Impak

ONE SOURCE IND. PRESENTS... NATURESTONE™ AS ITS NEWEST MATERIAL OPTION FOR OUR IMPAK PACKAGE.

The front component is made of NatureStone™. This material is affordable, prints well, creates a secure package, withstands super-heated conditions and is widely available.

NatureStone™ is an environmental packaging material that is made from limestone and is an effective replacement for paper. The limestone material that is used appears abundantly in nature, and can be produced without the cooking, chemical bleaching and chlorine processing that is required to produce paper, as it is naturally a bright white. It offers the printability and characteristics of paper combined with the water and moisture resistance of plastic. It allows for the highest print quality while resistant a variety of hostile conditions.

The product cell is made with recycled PETE. Recycled PETE is a material that is produced from post-industrial recycled scrap or from post-consumer recycled products, such as water or soda bottles.

The back component is produced with recycled content paperboard or E-Flute. This recycled material is produced in a much cleaner and more energy efficient process than prime paper.

The result is a super eco-friendly pack that brands extremely well, reduced source materials by 40% over comparable clamshells and surpasses and antiquates even the most current eco-packaging products that are available in the market. Impak EVO NatureStone™ is available now for production on a competitive, mass-merchandising scale.

NATURESTONE FEATURES & BENEFITS

- 100% Tree Free
- Zero Water Consumption
- No Chemical Bleaching or Hazardous Waste
- Low Energy Consumption
- Water Resistant
- Tear Resistant
- Naturally abundant - calcium carbonate - fifth most abundant element on earth
- Prints well - uses conventional inks and varnishing - normal press time

ILLUSTRATION OF YOUR CONTRIBUTION
TO PRESERVING OUR NATURAL
RESOURCES BY REPLACING 1 TON OF
VIRGIN COATED PAPER WITH NATURESTONE™

- 20 trees not cut down
- 42 lbs waterborne waste not created
- 7,480 gallons water/wastewater flow saved
- 167 lbs solid waster not generated
- 236 lbs atmospheric emissions eliminated
- 25 million BTU's energy not consumed

NATURESTONE™ IS ENVIRONMENTALLY RESPONSIBLE, ECONOMICAL AND EXTRAORDINARY
